Subject: Important Update on Stipendium Hungaricum Scholarship Extensions

Dear Stipendium Hungaricum Scholarship Holders,

I hope this message finds you well.

I am writing to inform you about an important change regarding the extension of the Stipendium Hungaricum scholarship at our university. Due to a policy change by the Tempus Public Foundation, universities are now responsible for covering the financial costs of extended studies for scholarship holders. Unfortunately, this change has made it impossible for our faculty to continue supporting the extension of the Stipendium Hungaricum scholarship. Please note that this change only affects scholarship extensions and does not impact your current scholarship period.

We truly understand that this news may be disappointing, especially for those who were planning to apply for an extension. However, this decision was made after careful consideration of our financial resources and the sustainability of the scholarship program.

We encourage you to plan your studies carefully to ensure you complete your program within the original scholarship period. Despite this change, we remain fully committed to supporting all Stipendium Hungaricum students. Our Faculty will do its best to assist you in successfully completing your studies on time. With your diligence and hard work, we believe you can graduate within the original scholarship period without needing an extension.

To further support students in this transition, the Faculty offers an option for those who need an extension and have 15 or fewer remaining credits to apply for a tuition fee reduction for one remaining semester. Students eligible for this option can submit a request in Neptun (IK - Tuition Fee Reduction Request due to Few Remaining Credits). The relevant deadlines are available in the [Semester Calendar](#) on our website.

We deeply appreciate your dedication and hard work as part of our university community. Your contributions and presence are valuable to us, and we remain committed to supporting you in achieving your academic and professional goals.

Thank you for your understanding, and please do not hesitate to contact us if you have any questions or need further clarification.

Best regards,

Dr. Tamás Kozsik

Dean

Faculty of Informatics
