Schedule of classes

Time	Group	Location	Instructor
Wednesday 12:00-13:00	IP-18fWF1EG-90 (lecture)	South B. 0-804 Lóczy Lajos	Abonyi-Tóth Andor
Wednesday 13:00-14:00	IP-18fWF1EG-91 (lecture)	South B. 0-804 Lóczy Lajos	Abonyi-Tóth Andor
Monday 12:00-14:00	IP-18fWF1EG-1 (practice)	South B. 2-107 (PC2)	Abonyi-Tóth Andor
Monday 12:00-14:00	IP-18fWF1EG-10 (practice)	South B. 00-524 (PC4)	Vincze Máté
Tuesday 16:00-17:30	IP-18fWF1EG-2 (practice)	South B. 2-107 (PC2)	Gaál Bence
Tuesday 8:00-10:00	IP-18fWF1EG-3 (practice)	South B. 2-107 (PC2)	Vincze Dorottya
Monday 10:00-12:00	IP-18fWF1EG-4 (practice)	South B. 2-107 (PC2)	Abonyi-Tóth Andor
Thursday 10:00-12:00	IP-18fWF1EG-5 (practice)	South B. 00-524 (PC4)	Vincze Dorottya
Tuesday 12:00-14:00	IP-18fWF1EG-6 (practice)	South B. 00-803 Prog. Nyelv.	Gaál Bence
Tuesday 14:00-16:00	IP-18fWF1EG-7 (practice)	South B. 00-524 (PC4)	Vincze Dorottya
Wednesday 8:00-10:00	IP-18fWF1EG-8 (practice)	South B. 00-524 (PC4)	Vincze Máté

About the course

Prerequisites

- You do not have to have any prerequisite knowledge of HTML or CSS or webdesign.

Purpose

- You will gain a foundational knowledge of website creation and be able apply it to the planning, design and development of your own website over the course of the semester.

Goals and objectives

- Be familiar with different web design theories and understand web terminology
- Be able to read and write HTML and CSS code
- Be able to plan & design webpages
- Create a full functioning website
- Understand how to upload websites to a web server
- Utilize WCAG 2.0 and its supporting documents as a guide to implementing accessible websites
- Apply WCAG 2.0 techniques to develop accessible layouts, forms, tables, and other content

Canvas LMS

The course materials will be available in the Canvas LMS, including

- Syllabus
- Tutorials
- Hyperlinks to recommended tutorials
- Practicing tasks
- Graded tasks
- Quiz questions

<https://canvas.elte.hu>

Course expectations

Attendance policy

- Students are expected to attend the **laboratory sessions**. (3 absences permitted / semester)
- It is not mandatory to attend the lecture.

Tutorials (lectures)

- You can learn the material of the lecture independently, it is not mandatory to attend the lecture.
- The lecture materials are developed online (Canvas LMS)
- You must complete the online test for the lectures
- Three major topics
 1. UX for the web
 2. Introduction to Cascading Style Sheets
 3. Introduction to universal design and Web Accessibility

Tutorials (lectures)

MENU

- 247 web usability guidelines
- Designing the UX
 - Designing the UX
 - What is a UX Designer?
 - T-shirt of an UX designer
 - "It Depends..."
 - Designing the UX
 - Designing the UX
 - Designing the UX
 - UX Design Techniques That Really Work
 - Personas
 - Personas
 - Benefits of Personas
 - Personas
 - Personas
 - User stories, scenarios, and storyboards
 - User stories, scenarios, and storyboards
 - Scenario
 - How to Write User Story Scenario?**
 - Storyboard
 - Writing-first design technique
 - Writing-first design technique
 - Writing-first design technique
 - Mind-mapping

UX for the web

Course expectations

Tasks

1. Homepage content + Wireframe
2. Self made, fully functioning, valid, responsive static homepage
3. Self check (Success criteria based review for your work)
4. Participation in a mandatory consultation
5. Filling in Quizzes

1/a Website content

- You have to collect/write the content of your website, and submit it to the Canvas LMS.
 - Content for minimum 3 webpages, including web form, min. 5 images, 1 video, 1 data table.
 - The more detailed requirements will be available in an Excel file.
- Document formats: doc, docx, pdf

Latest Patch Notes – SEPTEMBER 21, 2017

A new patch is now live on Windows PC. Read below to learn more about the latest changes.

To share your feedback, please [post](#) in the General Discussion forum.

For a list of known issues, visit our [Bug Report](#) forum.

For troubleshooting assistance, visit our [Technical Support](#) forum.

Please note that these changes will be rolled into a larger patch for PlayStation 4 and Xbox One at a later date.

GENERAL UPDATES

General

The credit that Mercy's Resurrect contributes toward her on-fire meter has been adjusted to account for the recent changes in its functionality.

Arcade

Hanamura, Horizon Lunar Colony, Temple of Anubis, and Volskaya Industries have been removed from the Deathmatch and Team Deathmatch map rotation, but can still be selected in Custom Games.

User Interface

Made several adjustments to the spectator camera to improve the viewing experience.

BUG FIXES

General

Fixed a bug that caused the audio from Junkertown's front gate to play when previewing and opening Loot Boxes.

Fixed a bug that prevented the stagger and knockdown VO from canceling active voice lines.

Fix

Mit

Fix

Maps

Fixed an issue that caused sound effects to continuously repeat when using a beam weapon (e.g. Zarya's Particle Cannon) to destroy the motorcycle in the attackers' spawn room on Junkertown.

Fixed an issue that activated audio cues that are typically associated with enemy hits when shooting the motorcycle on Junkertown.

Latest Hero

Doomfist is one of the heroes of Overwatch. He is a zealous and cunning criminal combatant who wants to drown the world in a future of conflict to strengthen humanity.

[video: <https://www.youtube.com/watch?v=vaZfzFNuQdI>]

Ability Overview

Doomfist's cybernetics make him a highly-mobile, powerful frontline fighter. In addition to dealing ranged damage with his Hand Cannon, Doomfist can slam the ground, knock enemies into the air and off balance, or charge into the fray with his Rocket Punch. When facing a tightly packed group, Doomfist leaps out of view, then crashes down to earth with a spectacular

Latest Map

Junkertown is an Escort map located in the harsh and unforgiving Australian Outback. Constructed from the remains of a destroyed omnium, it's now the home to a band of lawless scavengers known as the Junkers, led by their cutthroat Queen. When they aren't pillaging the omnium's skeleton for anything of value, the Junkers blow off steam in the Scrapyard—a massive gladiatorial arena whose combatants fight for glory, riches...and to survive.

Overwatch is notorious for its lag compensation. Lag compensation means that when a player with high ping does an action before a player with lower ping (the high ping player's action gets to the server later), the high ping player's action gets checked against the low ping player at the moment of the action, regardless where the low ping player currently is. If on the high ping player's screen the action registered, then the low ping player goes "back in time" completing the action.

This creates plenty of frustrating scenarios. For example, a Tracer uses two blinks to get through a Roadhog, but on Roadhog's side he hooked her, placing Tracer back to the hook's landing zone, and replenishing her blinks. This is a common practice in today's gaming, but in a competitive game like Overwatch, this is an unacceptable way of dealing with lagging players.

There is actually another way, this method checks which action went to the server first, preferring low ping players, which would be, in my opinion, the preferred way of doing a competitive game.

But Blizzard was always a company that went more towards the wider audience, which implies that they don't want people with poor internet connection to suffer, so I do not expect any change in this problem. But I sure do hope...

1/b Website wireframe

- Wireframing is a way to design a website service at the structural level.
- You have to design your website as (digital) wireframe, and submit it to the Canvas LMS.
 - The wireframe must contain all of the pages, (minimum 3 webpages, web form, etc)
- Document formats: pdf or zipped images

Wireframe examples (3 pages)

2. Self made website

- You have to develop your static website, and upload it to the Canvas LMS as ZIP file.
 - It must contain
 - at least 3 pages (including the front page [index.html])
 - all of the media elements (images, videos)
 - Maximum size of the zipped version: 100MB
- Its structure and code should be different from the case studies presented in the lessons.

Guidelines / Success criteria

2	Course requirement	There is at least one page (or block) that contains a background image
3	Course requirement	There are at least 5 images inserted on the pages. At least 2 images should be thumbnails (to be linked to the original version of the image)
4	Course requirement	There is a page that contains a table (at least 2x3 in size, with table header (<th>), caption, and summary). Note: The layout of the website shouldn't be realized by tables!

- Site rating: 2
- Site rating: 3
- Site rating: 4
- Site rating: 5

Comment:

3. Self assessment

- You have to make a self check with the help of the Excel file.
- You need to mark that success criteria, which are applicable to your work.

2	Course requirement	There is at least one page (or block) that contains a background image	1
3	Course requirement	There are at least 5 images inserted on the pages. At least 2 images should be thumbnails (to be linked to the original version of the image)	1
4	Course requirement	There is a page that contains a table (at least 2x3 in size, with table header (<th>), caption, and summary). Note: The layout of the website shouldn't be realized by tables!	0

4. Mandatory consultation

- You must register for a mandatory consultation (April 23 - 30, 2025) and you need to present the state of your homepage for your instructor.
- The readiness level should be at least 50%
- You will have 10 minutes to present your work and answer the questions.
- For this task you can get 20 points from your instructor.
- If you have made good progress and show us your website earlier, we will give you the score for the mandatory consultation earlier.

5. Quizzes

- Each main topic has a quiz at the end.
 - Basics of WWW, HTML5 (Practice Quiz)
 - Introduction to CSS3 (Graded Quiz)
 - User Experience (Graded Quiz)
 - Universal Design/Web accessibility
 - Bootstrap framework (Practice Quiz)
- The Quizzes contain true/false, multiple choice, fill in the blank and essay questions.

Facultative task

- Writing blog post about the web-development
- You can achieve 25 extra points

Course expectations

Deadlines

- All work is due on or before the due date.
- There is no possibility to extend the deadlines.
- You can't modify your website after the final submission date. If you want extra points, you have to do extra work (writing blog post for 25 points)

Grading

Task	Type	Maximum points	Minimum points required to achieve
Webpage content, and wireframe	compulsory	30	15
Self developed homepage	compulsory	100	50
Self check	compulsory	20	10
Mandatory consultation	compulsory	20	10
Quizzes	compulsory	30	15
Writing blog post	facultative	25	
	Sum (comp.)	200	100

Grades	From To	
Insufficient (1)	0	99
Sufficient (2)	100	124
Satisfactory (3)	125	149
Good (4)	150	174
Excellent (5)	175	200

Students are evaluated on the basis of their timely and effective completion of homework assignments.

Deadlines

Task	Deadline
Website content (doc) and wireframe (pdf or images) submission	March 14, 2025 (Friday 23:59)
Participation in a mandatory consultation	April 23 - 30, 2025 (Wed – Wed)
Self-made, static website and self assessment (Excel table) submission	May 16, 2025 (Friday, 23:59)
Quizzes	Different deadline for each quiz
<i>Writing blog post (facultative task for 25 extra points)</i>	We will publish later
